

## Adding Value to Business Technology

**Let our specialists,  
software and services  
be your guide to  
real-world best  
practices in business  
process management,  
IT governance and  
enterprise architecture.**

# Our Mission

To provide **products** and **services** that align the **strategic objectives** of your business with information technology capabilities, **maximizing the value** returned from IT and creating a productive environment promoting growth and innovation.

# Our Vision

In the most basic sense, a business identifies target markets and the value propositions that will capture the interest of those markets. But to execute well on that simple idea—to succeed now and drive new revenue and profit in the future—a business needs its processes, operational capabilities and technological infrastructures working in tandem.

Our vision is to provide a robust portfolio of customized business optimization solutions—unique, targeted consulting services and software applications—in three core areas to help you evolve your business and IT capabilities into a cohesive, mutually supporting enterprise:

**Business Process Management:** Define, improve and integrate business goals and processes to improve productivity, efficiency and sustainability

**IT Governance:** Identify and implement processes that streamline and control execution of complex IT activities to meet business expectations and deliver highest possible value

**Enterprise Architecture:** Develop a roadmap of the technology infrastructure—application, security and information architecture—and the business and technology processes to best support strategic objectives and foster growth and innovation

## Our Commitment

- [1] Elite Value Solutions is committed to adding the most customer value possible to our solutions.
- [2] You'll realize immediate value in the form of increased productivity and improved operational efficiencies. But there's more.
- [3] We understand the financial impact that business-IT alignment can have on your company. So we offer our open-system EliteBPM business process management software with a free licensing option\* and extensive customization to make your investment go farther.

# Our Expertise

We provide highly qualified specialists and state-of-the-art software and services to help your company align infrastructure and processes to enable it to quickly strike when new business opportunities are hot.

Look to Elite Value Solutions for:

- Business process improvement and reengineering
- IT infrastructure assessment and optimization
- Solutions that deliver high productivity and value back to the business
- Your roadmap to an agile environment driving growth and innovation
